EDUCATION

University of Education, Bachelor of Computer Science

Aug 2023 - Aug 2027

Relevant Coursework : Data Structures & Algorithms in C++, OOP, Networking, DBMS

SUMMARY

Frontend & Backend Developer with hands-on experience building full-stack applications using the **MERN stack (MongoDB, Express.js, React.js, Node.js)** along with **Supabase, and MySQL**. Skilled in developing responsive, user-focused interfaces and scalable backend APIs. Experienced in working with modern development tools such as **Git, REST APIs, OAuth authentication, and state management**. Strong at problem-solving, maintaining clean code practices, and delivering reliable software solutions in collaborative environments.

EXPERIENCE

Fellow Frontend Developer – Community Hackathon

July 2024

Hackathon Project: “[Diversify](#)” - 2024

- Proposed and developed a LinkedIn-style networking platform for engineers.
- Built a responsive frontend using React.js and Tailwind CSS for MVP delivery.
- Worked with a cross-functional team to deliver the MVP in a 24-hour sprint.

PROJECTS

[Rare Rides Autos](#): Built a car marketplace platform to showcase rare vehicles with listings, detail pages, and responsive layouts using HTML, CSS and JavaScript. Focused on clean UI and smooth navigation.

[Resort Booking App](#): Created a single-page resort booking web app with dynamic search filters, reusable components, and responsive design using React and Tailwind. Deployed on Vercel.

[Admin Dashboard](#): Developed a responsive admin panel with charts, user management, and modular components using React and MUI. Built with Vite for fast performance and deployed on Vercel.

[Real Estate App](#): Developed a full-stack MERN real estate web app where users can browse and filter property listings. Implemented secure JWT authentication, Appwrite image uploads, and complete CRUD for user-managed properties. Built with React, Tailwind, Node, Express, and MongoDB.

[Doctor Appointment Platform](#): Developed a MERN stack doctor appointment platform with role-based access for admin and doctors, secure user authentication using JWT and Bcrypt, and specialist-based appointment booking with weekly scheduling support.

[Ecommerce Platform](#): Developed a Full Stack Ecommerce Platform for baby products where users can browse products, view details, manage their cart and place orders through a responsive interface. Also built a secure admin portal to manage products, categories, orders and users with CRUD operations and an intuitive dashboard for efficient store management.

SKILLS

Programming: JavaScript, TypeScript, C/C++ DSA, OOP, Competitive Programming

Frontend: React, Next.js, TailwindCSS, MUI, Redux Toolkit

Backend: Node.js, Express.js, Supabase, MongoDB, SQL, PostgreSQL

Tools: Git, GitHub, Postman, Notion, Socket.io, Clerk, VS Code, Cursor, v0, Lovable.dev, Bolt

Technical Skills: Screen recording workflows, following detailed documentation, multitool navigation, workflow annotation

HONORS AND AWARDS

- **1st Runner-up** - UE Code Quest (2024), a university-wide programming competition.
- Participated in national-level coding contests at **LUMS**, **PU**, and **other universities**.
- **100+** Problem Count on **LeetCode**.
- Top-performing student in the Computer Science department with a CGPA of **3.56/4.0**.

ADDITIONAL STRENGTH

- Strong attention to detail and consistency in recording, labeling, and documentation
- Comfortable using various software tools and interfaces.
- Committed to confidentiality and secure data handling.
- Reliable system usage and stable internet workflow experience.
